Status

Credit Analyst Review Complete

Decision: Decrease
Old Limit: \$600.00
New Limit: \$1,000.00
Risk Score: 100/100
Risky Transactions: 26
Late Payments: 5

Reasoning: Credit limit decrease recommended because the customer shows high risk indicators, such as high utilization, late payment history, and/or multiple risky transactions. Main risk factors: credit utilization is above 90%, 26 risky transaction(s) found, 5 late payment(s) found.

CreditGuard Summary

Customer: Sai | Credit Score: 735
Annual Income: \$72,000.00
Employment: Full-time
Current Limit: \$1,000.00
Current Balance: \$23,682.76
Utilization: 2368.28%

Latest Credit Analyst Decision

Status

Credit Decision Summary

- **Decision**: Decrease
- **Old Limit**: \$1000
- **New Limit**: \$900
- **Risk Score**: 71 (High risk)
- **Economic Context**: Current trends indicate a rise in consumer credit risk, with delinquency rates at a peak and households relying heavily on credit amid inflationary pressures.

Reasoning
The customer's profile reveals a severe utilization issue of 2368.28%, along with 5 late payments, which signifies high risk. The broader economic context further supports a decrease, as rising consumer credit risk trends suggest caution in lending practices.

Actions taken include saving the decision and logging the audit.

CreditGuard Summary

Customer: Sai | Credit Score: 735
Annual Income: \$72,000.00
Employment: Full-time
Current Limit: \$900.00
Current Balance: \$23,682.76
Utilization: 2631.42%

Latest Credit Analyst Decision

Decision: Decrease
Old Limit: \$1,000.00
New Limit: \$900.00
Risk Score: 71/100
Reasoning: Credit profile shows a utilization of 2368.28% with 5 late payments, indicating high risk. Economic context points to an overall rise in consumer credit risk with increased delinquencies.

Status

Credit Limit Decision Summary

--**Customer Name**--: Sai

--**Old Limit**--: \$3000

--**New Limit**--: \$3000

--**Risk Score**--: 57 (Moderate Risk)

--**Economic Context**--: Recent trends show an increase in credit card delinquencies, which raises concern about financial stability for customers.

Decision Reasoning:

The customer has a credit score of 735, a utilization rate of 50.25%, and one late payment. Given these factors combined with the current economic context of rising credit card delinquencies, the decision was made to place the account under Manual Review.

Audit Log Entry

--**Actor**--: Credit Analyst Agent

--**Log Type**--: Decision Log

--**Message**--: Customer Sai (CUST001) reviewed for credit limit. Decision: Manual Review. Old Limit: \$3000, New Limit: \$3000, Risk Score: 57. Reason: Moderate risk due to utilization at 50.25% and 1 late payment. Economic context shows upward trend in credit card delinquencies.

CreditGuard Summary

Customer: Sai | Credit Score: 735

Annual Income: \$72,000.00

Employment: Full-time

Current Limit: \$3,000.00

Current Balance: \$1,507.59

Utilization: 50.25%

Latest Credit Analyst Decision

Decision: Manual Review

Old Limit: \$3,000.00

New Limit: \$3,000.00

Risk Score: 57/100

Reasoning: The customer has a credit score of 735 and one late payment, with 50.25% utilization. This indicates moderate risk, exacerbated by the recent upward trend in credit card delinquencies.
